STUDY AND PARTICIPATION INFORMATION

This spring, we have one on-going studies. The study will be led by Ava Brueggeman and Ria Ghosh, supported by Juliana Saba. Let us know which studies you can participate in!

ON-GOING STUDY DETAILS:

A. “SE-1.” CCi-MOBILE Android App Testing
   1. a. Investigation Identifier: SE-1
      b. Task: Repeat random sentences spoken by a normal-hearing partner from the IEEE database in two different environments- in-booth and in-field (multiple locations on the UT-Dallas campus) using our mobile mode (Android/JAVA). We will record scores in two different settings - with and without supplemental visual cues (lip-reading) in each environment.
      c. We will record your best response.
      d. Investigator: Ava Brueggeman and Ria Ghosh
      e. Time: Approx. 1.5-2 hours
      f. Study Availability: Feb 1, 2020 – March 15, 2020

HOW TO PARTICIPATE

To participate in the test simply shoot us an email and we will send you more information to participate in the study on your schedule!

NEW OPTION! For those bilateral cochlear implants users, instead of choosing your better ear for testing, you may choose to test with BOTH ears individually. Now, this will double your time at UTD but will give us an opportunity to receive more results and better feedback from our studies. If you wish to participate with BOTH ears, let us know so we can accommodate for your longer stay at UTD.
